Let’s Do it Together!

Become a 2022 Global Challenge Partner!

The A--D Global Challenge helps accelerate the development of the most inclusive and sustainable architectural projects worldwide.

Our official partners help us build a world where architecture serves the needs of the many — not just a privileged few.

Your contribution of €10,000 minimum helps us support communities on the frontlines of today’s social and environmental emergencies.

- We connect underserved self-build communities with our global network of 60K+ architectural professionals.
- 50% of your contribution goes directly to a specific community project to accelerate its development.
- 50% goes to improving the reach of the Global Challenge, and building the capacity of our network.

All Global Challenge projects are selected carefully for their feasibility, social and environmental impact and contribution to UNSDGs.

#GC2022 partners are promoted in A--D media, external media, gain access to exclusive project content, and may be selected to participate in the jury process.
